Udemy Course Certificate

ABOUT ME

I would like to gain the necessary work experience to achieve my dream position of being a senior back-end Python engineer or web developer. I am a hard-working, fast learning and dedicated individual who enjoys the challenge that problem solving invites. I adapt to most office environments very quickly, thrive in chaotic scenarios and love working in a team.

ACHIEVEMENTS & KEY PROJECTS

- **MINE DETECTOR ROBOT**
  Web app controlled robot built with Raspberry Pi that uses node.js to POST instructions from the web app controls to the Raspberry Pi.

- **GESTURE CONTROLLED VOLUME**
  Python powered program that uses python's mediapipe and OpenCV libraries to read hand gestures.

- **SEAT BOOKING WEBSITE(Hackathon Popular Vote)**
  Seat booking website using Javascript DOM, AJAX,
  Bootstrap and HTML.

- **PORTFOLIO WEBSITE**
  Interactive Portfolio website created with the use of React and Bootstrap.

- **DEVHELP WEBSITE(Hackathon 1st place winner)**
  A new take on a job finding app geared specifically for developers in South Africa to share projects. Using Java, Firebase and Android Studio as an IDE

- **YOUNGLINGS HR SYSTEM**
  A human resource web-app using React JS, Bootstrap, Firebase and Afrihost for hosting.
